

Agent Interface Architecture Diagrams

1. High-Level Architecture

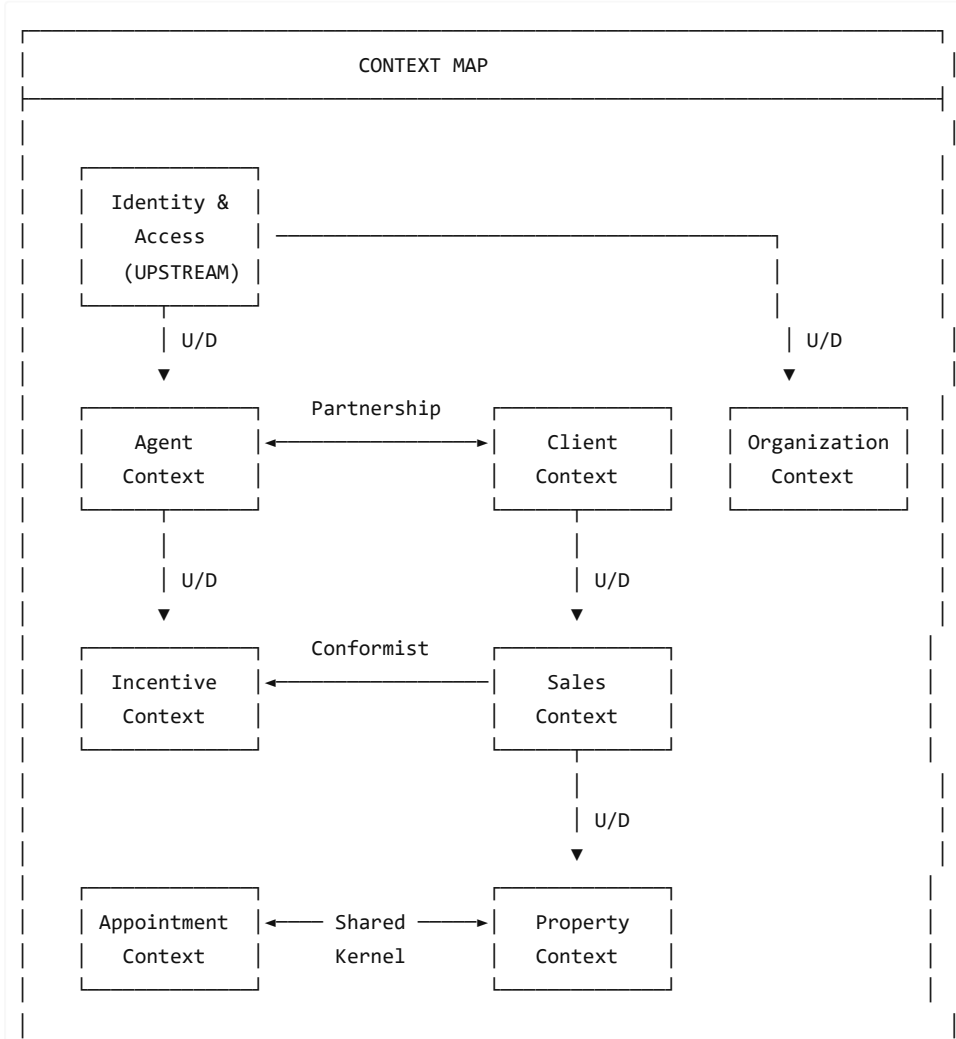

2. Bounded Contexts

3. Context Map

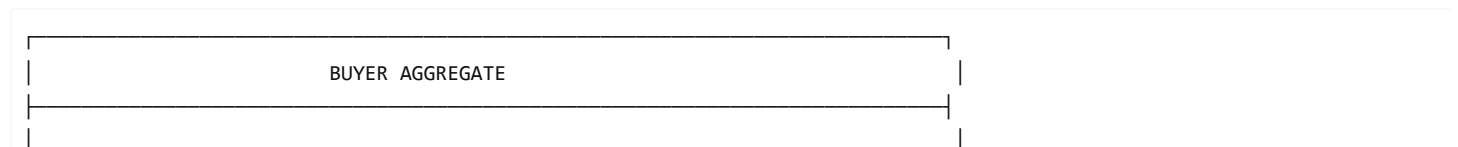

Legend: U/D = Upstream/Downstream

4. Agent Aggregate

5. Buyer Aggregate

Buyer (Aggregate Root)

- id: BuyerID
- userId: UserID (optional - if registered)
- buyerType: BuyerType (principal-buyer | co-buyer)
- personalInfo: BuyerPersonalInfo (Value Object)
- contactInfo: BuyerContactInfo (Value Object)
- address: BuyerAddress (Value Object)
- employmentInfo: EmploymentInfo (Value Object)
- spouse: SpouseInfo (optional Value Object)
- coBuyer: CoBuyerInfo (optional Value Object)
- spa: SpecialPowerOfAttorney (optional Value Object)
- eSignature: Signature (optional Value Object)

AgentBuyerRelationship (Entity)

- agentId: AgentID
- buyerId: BuyerID
- assignedAt: Timestamp

6. Agent Incentive Aggregate

AGENT INCENTIVE AGGREGATE

AgentIncentive (Aggregate Root)

- id: IncentiveID
- agentId: AgentID
- saleId: SaleID
- unitId: UnitID
- approvedByUserId: UserID (optional)
- requestedByUserId: UserID (optional)
- totalIncentive: Money (Value Object)
- status: IncentiveStatus (pending|approved|rejected|paid)
- items: List<IncentiveItem> (Entity)
- dateNeeded: Date (optional)
- rfpAttachment: FileReference (optional)
- remarks: string (optional)
- rejectionReason: string (optional)

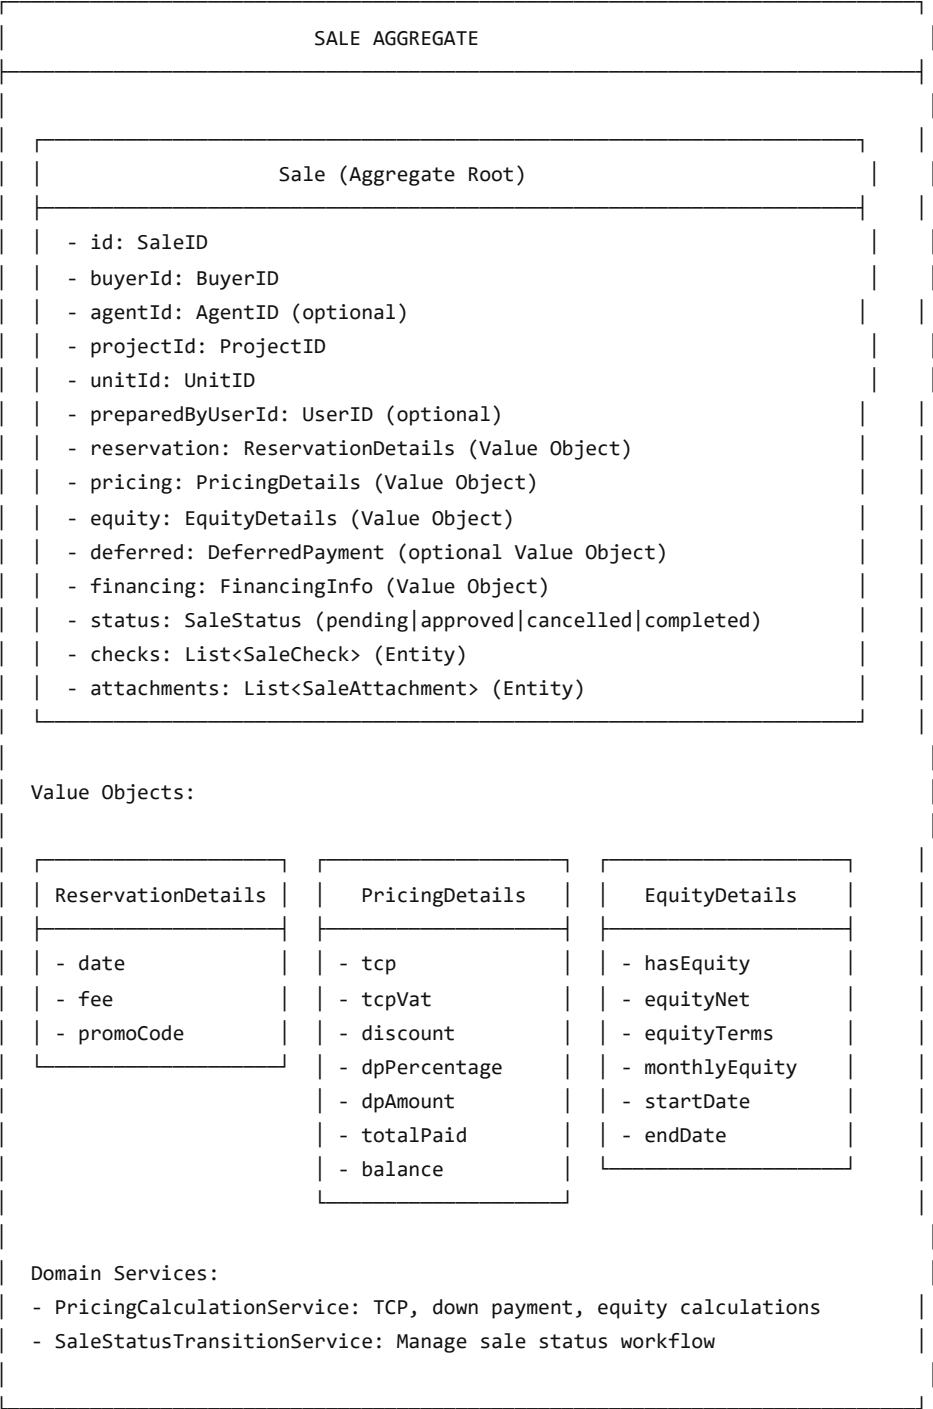

IncentiveItem (Entity)

- id: ItemID
- incentiveType: IncentiveType (commission|bonus|override|etc)
- amount: Money (Value Object)

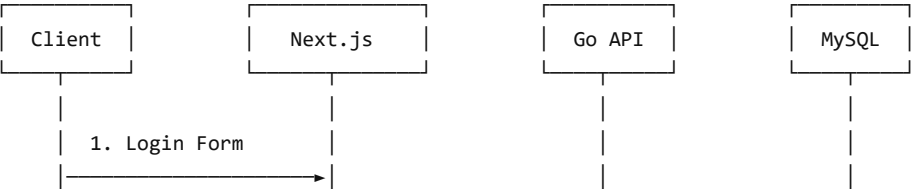

Domain Services:

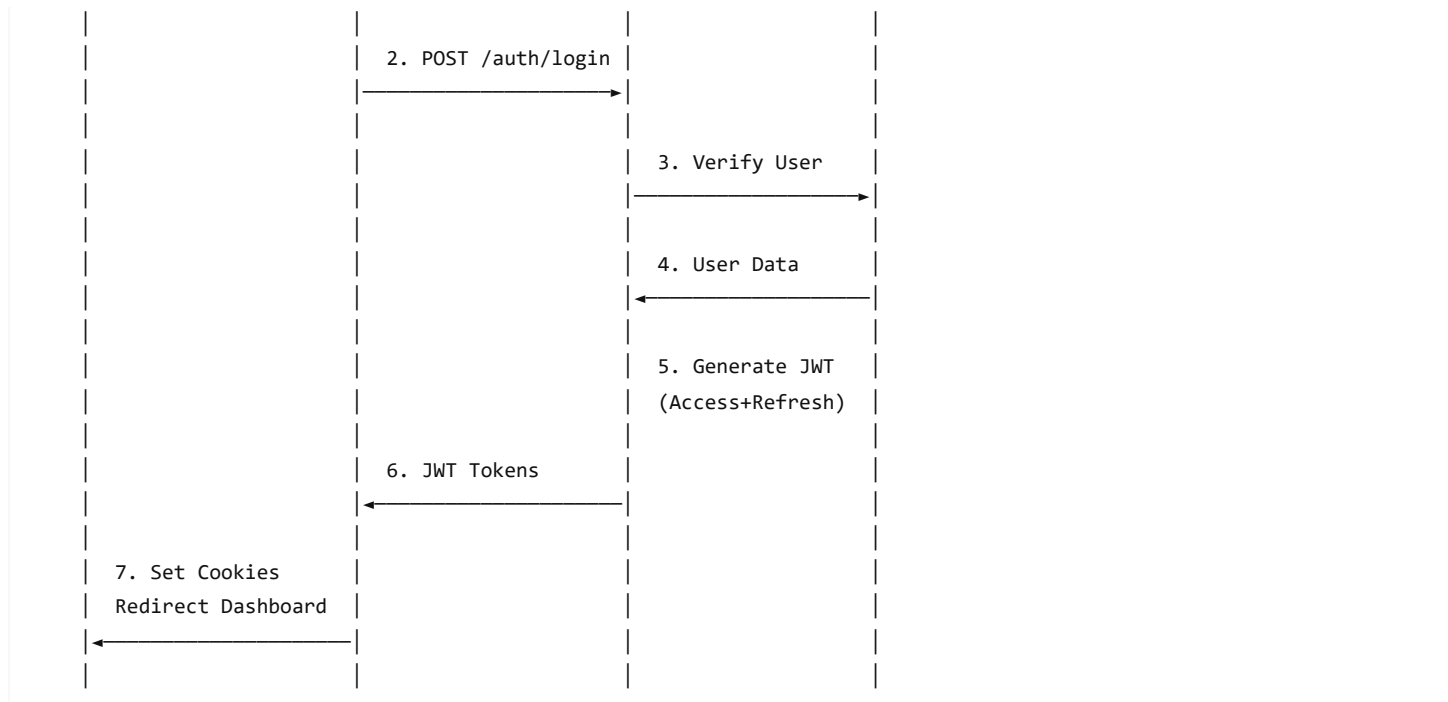

- IncentiveCalculationService: Calculate incentive based on sale
- IncentiveApprovalService: Manage approval workflow

7. Sale Aggregate

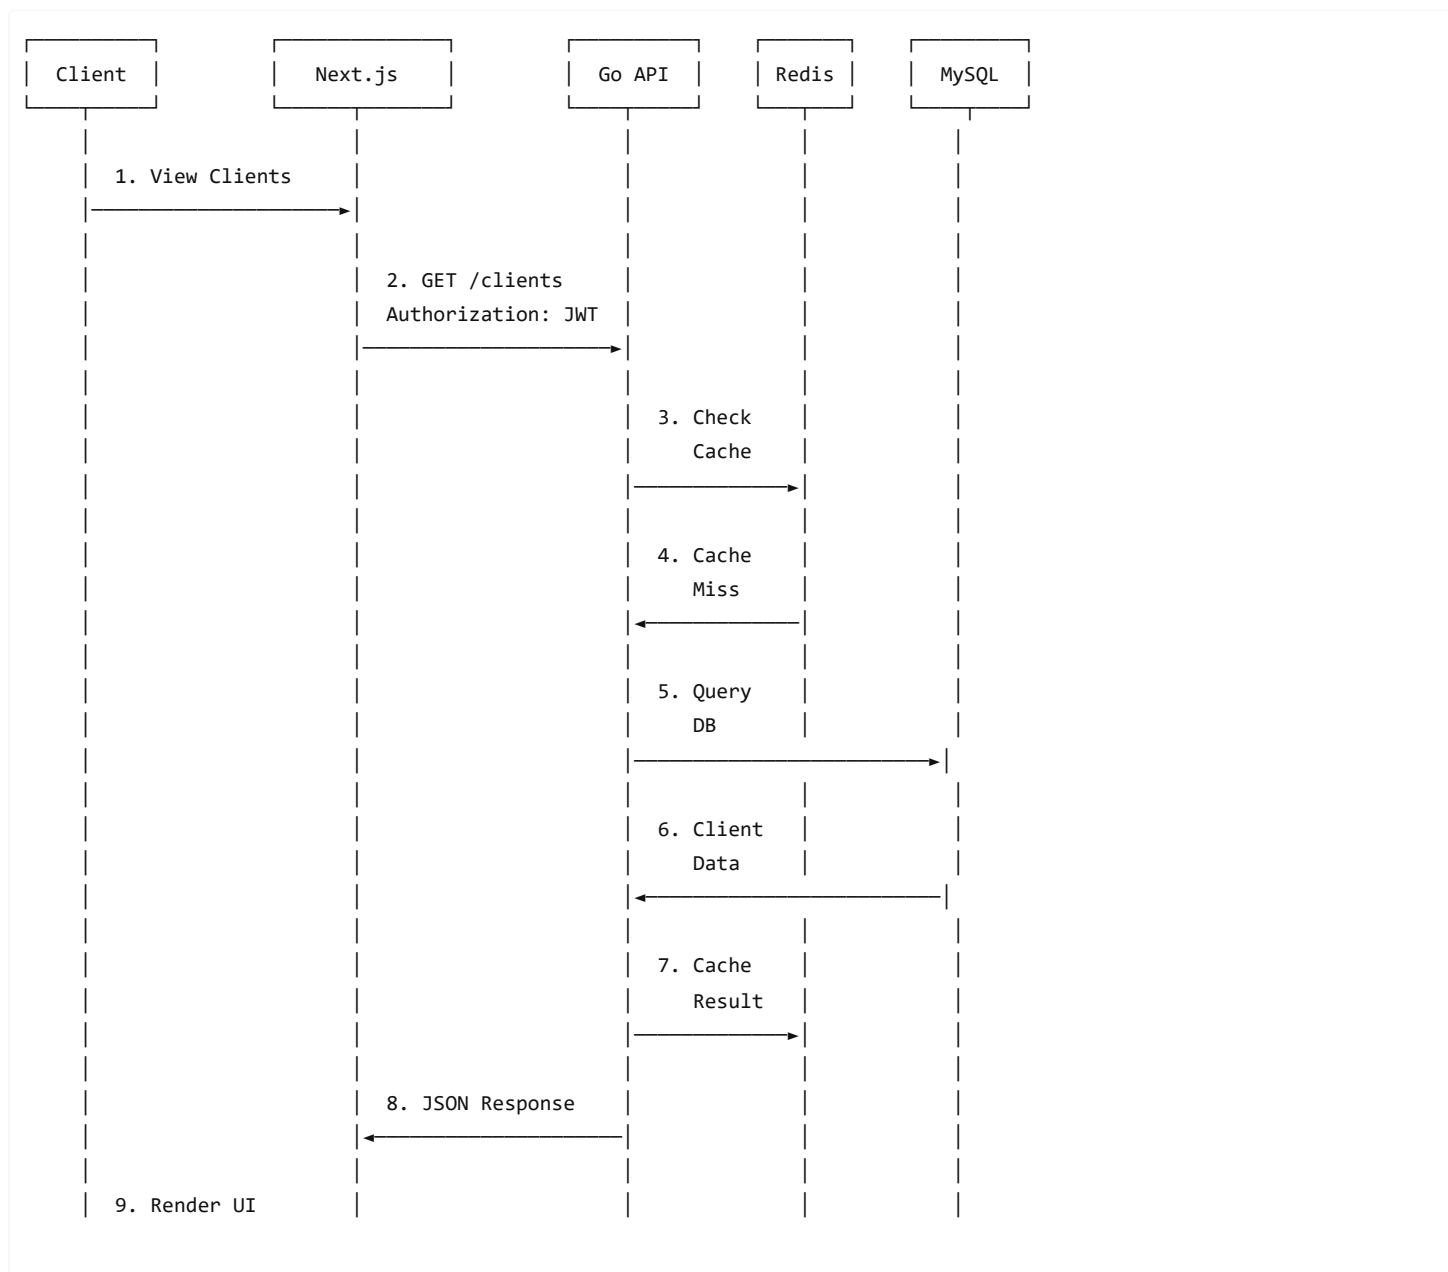

8. Authentication Flow

9. Client List Data Flow

10. Referral Link Generation Flow
